

**Required Features**

Feature #	Feature Name	Feature Description	Included in Proposed Price: Yes, No, Partially
1	DEP Integration	Integration with Apple Device Enrollment Program	
2	Script Delivery	Ability to deliver custom scripts to managed devices	
3	Hardware Device Management	Ability to manage and interact with the device to control physical settings such as function keys, power state, sleep state hibernation state, disable cameras, microphones, USB Ports etc	
4	Controlled Admin Privileges	Ability to manage “escalated privileges” eg standard users do not have admin privileges but when interacting with the “software library” the Management Software can grant itself admin privileges so it can be self-installed.	
5	User- Self Administration	A “self-service” repository or application that is available to users for them to “self-administer” pre-approved changes to their computer such as software updates, adding a printer, installing pre-approved applications.	
6	User Repository	The “software repository” or management software/servers should reside in a controlled/hosted solution by the identified provider.	
7	Support	Direct Call in Support - 24/7 access to support engineers	
8	VPP Integration	Integration with Apple Volume purchase program	
9	User ID Management	User Account Management	

		integration with centralized directory providers such as Google Directory, Active Directory, Apple School Manager, Jumpcloud	
10	Asset Tracking	Ability to track Asset purchase dates	
11	Software Deployment	Custom Software Package Deployment	
12	Software Distribution	Software Distribution - The ability to manage and support desktop & mobile application uses including deploy, install, update, delete or block.	
13	Policy Management	Policy Management - Development, control and operations of enterprise desktop & mobile access, connectivity, and security policy, location based policy enforcement	
14	Inventory Management	Inventory Management - Software, firmware, hardware, and peripheral device inventory management, this includes provisioning and support.	
15	Security Management	Security Management - The implementation and enforcement of device security, authentication, validation and encryption functionality.	
16	Remote Device Control	Remote device lock	
17	Inactivity Lock	Device lock (after a given period of inactivity)	
18	Group Policy Management	Administer policies as groups	
19	Individual Policy Management	Administer policies as individuals	
20	Complex Group Policy	Support complex group policies (multi-layered, hierarchical, etc.) and/or individual policies	
21	Internet Connection	Disable automatic	

	Control	connection to Wifi networks	
22	Policy compliance reporting	Policy compliance reporting	
23	Service Access Methods	Access to the management server via web-based console	
24	Repository Management	Support granular restrictive access to specific public app repositories and/or specific applications on specific public app repositories	
25	Screen Capture	Disable screen capture	
<b>Optional Features</b>			
Feature #	Feature Name	Feature Description	Included in Proposed Price: Yes, No, Partially
26	Password Rules	Complex password enforcement (strong alphanumeric password)	
27	Remote Wipe	Remote device wipe	
28	Remote Password Management	Remote reset of the device password	
29	Browser Management	Disable use of preinstalled browser	
30	GPS Management	Disable Location-based services (GPS)	
31	OS Management	Support Management of Linux & Windows Devices	

**Pricing Matrix**

Device Type	Annual Cost Per Device	Device Count	Total Annual Cost
Macbooks		2400	
Ipads		104	
Apple TV's		205	
Windows Devices		40	
System Level Costs *			

**Combined Annual Cost**

\* These are costs that are fixed or based on a system level that are independent of and are not impacted by device count
